

# Exploring a future-proof Haringvliet

Visiting stakeholders through an inspiring hop-on hop-off tour

Field trip location: Haringvliet, NL  
Peek field trip code: 5515  
Course: Marine Systems  
Amount of followers: 100+  
Type of route: Fixed route with numbers, because the route forms a story with different perspectives

## Short description of field trip:

The 100+ students were taken to the Haringvliet by buses. Here, they received their bike which they could use to cycle from location to location. During the trip, the students learned about Nature Conservation in the Haringvliet, looking at different perspectives and specifically focusing on the potential effects of climate change in the future. Also, they were asked to do water quality measurements.

## Inspiration:

in this trip, several stakeholders were asked to prepare a short podcast about their vision on the project. These podcasts were added to the questions at different locations so students could listen to these stories while observing the surroundings.

## Form of transport:

Bus travel from area one to area two. Students could hop-on hop-off.

## Fixed or own time:

At one specific day in 2020.
